≈ 157,494 solid organ transplants
≈ 9.1% increase vs 2021
≤ 10% of global needs
39% living kidney transplants
24% living liver transplants

41,792 deceased donors (32,248 DBD and 9,544 DCD donors)*

Information of 91 Member States on organ transplantation activities (75% of the global population)
DECEASED DONATION ACTIVITY
Deceased donation pmp in relation to the Human Development Index (HDI) 2022

WHO Regions:
- African Region (AFR)
- Region of the Americas (AMR)
- Eastern Mediterranean Region (EMR)
- European Region (EUR)
- South-East Region (SEAR)
- Western Pacific Region (WPR)

Dots represent responding Member States in each WHO region.
Actual deceased organ donors by donor type (pmp) 2022

DBD donors: 32,248 (77%)
DCD donors: 9,544 (23%)
Actual DCD donors by Maastricht type (pmp) 2022

DCD donors: 9,544

Type II: 106 (1%)
Type III: 8,798 (92%)*
Type IV: 640 (7%)

DCD activities reported in 23/91 countries

Type II: Unexpected cardiac arrest, unsuccessfully resuscitated
Type III: Planned WLST with an expected cardiac arrest.
Type IV: Sudden or planned cardiac arrest after brain death.

*Includes type V DCD donors (donors after MAiD) for Belgium, Canada, Netherlands and Spain
Actual deceased organ donors by donor age (pmp) 2022

N=69 countries provided information on donor age groups

2 371 (6%) DD < 18 years
28 105 (69%) DD 18-59 years
10 151 (25%) DD ≥ 60 years
Actual deceased organ donors by age (%)

2022

N=69 countries provided information on donor age groups

2,371 (6%) DD < 18 years
28,105 (69%) DD 18-59 years
10,151 (25%) DD ≥ 60 years
Actual deceased organ donors by donor sex

2022

68 countries provided information according to donor sex

25,398 (64%) male donors
14,553 (36%) female donors
Deceased donation activities reported in 71/91 countries

Actual donor: deceased person from whom at least one organ was recovered for the purpose of transplantation.

Utilized donor: deceased person from whom at least one organ was transplanted.

*Canada only reported utilized deceased donors
Actual deceased organ donors and transplants from deceased donors by type of organ (pmp) 2022

Deceased donation activities reported in 71/91 countries

*Organs recovered from deceased donors may be used for transplantation in other jurisdictions, particularly in the absence of local transplant programs.
Actual DBD donors and transplants from DBD donors (pmp)

2022

DBD donors: 32,248 (77%)

DBD activities reported in 71/91 countries

*Organs recovered from deceased donors may be used for transplantation in other jurisdictions, particularly in the absence of local transplant programs.*
Actual DCD donors and transplants from DCD donors (pmp) 2022

DCD TRANSPLANT activities reported in 24/91 countries

DCD donors: 9 544 (23%)
Transplants from DCD donors per type of organ (pmp) 2022

Data Source: Global Observatory on Donation and Transplantation
Map Production: WHO GIS Centre for Health, DHA/DDH
Map Creation Date: 21 September 2023
Transplants from living donors per type of organ (pmp) 2022

Total number of LD transplants:
- 39,601 kidney transplants
- 9,061 liver transplants
- 14 lung transplants

Living transplants performed in 90/91 countries
Kidney transplants from living donors (pmp) 2022

39 601 living kidney transplants

Living kidney transplants performed in 89/91 countries
Liver transplants activities from living donors (pmp) 2022

9,061 living liver transplants

Living Liver transplants performed in 47/91 countries
N= 78 countries provided information on donor sex

Living kidney donors by donor sex (%)

2022

17 045 (50%) male kidney living donors
17 006 (50%) female kidney living donors

% Male Kidney LD
% Female Kidney LD
Living liver donors by donor sex (%)

2022

4,720 (58%) male living liver donors
3,389 (42%) female living liver donors

N= 39 countries provided information on donor sex
GLOBAL ORGAN TRANSPLANT ACTIVITY
Global transplantation activities of solid organs, 2022*

Number of organ transplants per million population:
- 0.1-4.9
- 5.0-14.9
- 15.0-24.9
- 25.0-49.9
- 50-74.9
- 75.0-99.9
- ≥100.0
- No transplant activity

*Rates (pmp) are calculated by applying the population of the responding countries*
Patients ever active on Kidney WL: Patients who have been active on the WL at any moment along the year. A patient active on the WL is defined as a candidate eligible to receive organ offers for transplantation at a given point in time.

Patients awaiting on the WL at 31st Dec: Patients who are active on the WL at the end of the year.

Patients dead on the WL: Patients who have died while on the WL along the year.

N= 90 countries
Patients on the Liver WL versus Liver transplants (pmp) 2022

N= 73 countries

*Patients ever active on WL: Patients who have been active on the WL at any moment along the year. A patient active on the WL is defined as a candidate eligible to receive organ offers for transplantation at a given point in time.

Patients awaiting on the WL at 31st Dec: Patients who are active on the WL at the end of the year.

Patients dead on the WL: Patients who have died while on the WL along the year.
Patients on the Heart WL versus Heart transplants (pmp) 2022

N= 60 countries

*Patients ever active on WL*: Patients who have been active on the WL at any moment along the year. A patient active on the WL is defined as a candidate eligible to receive organ offers for transplantation at a given point in time.

*Patients awaiting on the WL at 31st Dec*: Patients who are active on the WL at the end of the year.

*Patients dead on the WL*: Patients who have died while on the WL along the year.
Patients on the Lung WL versus Lung transplants (pmp) 2022

N= 53 countries

*Patients ever active on WL: Patients who have been active on the WL at any moment along the year. A patient active on the WL is defined as a candidate eligible to receive organ offers for transplantation at a given point in time.

Patients awaiting on the WL at 31st Dec: Patients who are active on the WL at the end of the year.

Patients dead on the WL: Patients who have died while on the WL along the year.
Global distribution of countries with legal frameworks for organ donation and/or transplantation*

- Countries with any legal requirement covering the organ donation and/or transplantation (donation of live and/or deceased persons)
- Data not available or countries with no legal requirements in place
- Not applicable

*Data from the Global Observatory on Donation and Transplantation

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

Data Source: Global Observatory on Donation and Transplantation
Map Production: WHO GIS Centre for Health, DNA/DDI
Map Creation Date: 29 June 2022
Global distribution of countries per type of consent for deceased organ donation*

*data from the Global Observatory on Donation and Transplantation

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.
TRANSPLANTS PERFORMED ABROAD AND NON-RESIDENTS TRANSPLANTS
At least 600 patients from 31 countries travelled for transplantation abroad in 2022

Cases reported by the country of origin
46/91 countries were able to provide this information

Note: Not all countries were able to provide detailed information. Therefore figures may be underestimated.

* Countries that reported at least one patient who travelled abroad for transplantation/countries able to provide this information within the corresponding region
More than 2,600 non-resident patients from 22 countries were reported to be transplanted from a living (n=2,086) or a deceased (n=577) donor in 2022.

_Cases reported by the country of destination_

54/91 countries were able to provide this information.
The GODT is a collaborative effort of WHO and the ONT of Spain. It is running since 2007 and came up in response to the request of the World Health Assembly, in Resolutions WHA57.18 and WHA63.22, to collect global data on the practices, safety, quality, efficacy, epidemiology and ethical issues of allogeneic transplantation. This database collects data on global donation and transplantation practices, and it is recognized as a tool for ensuring transparency, equity and monitoring national transplant systems.

Methods and definitions

An *ad hoc* standardized questionnaire for activities related to organ donation and transplantation is annually distributed to the identified health authorities and national focal points contributing to the global database.

The definitions applied for the completion of the standardized questionnaire are derived from the WHO Global Glossary on Donation and Transplantation, which is accessible at [http://www.transplant-observatory.org/download/global-glossary/](http://www.transplant-observatory.org/download/global-glossary/) or through the WHO website ([http://www.who.int/transplantation/activities/en/](http://www.who.int/transplantation/activities/en/)).

Definitions and explanations about how to complete the questionnaire can be found at the Global Observatory on Donation and Transplantation website ([http://www.transplant-observatory.org/](http://www.transplant-observatory.org/)).
Actual donor (=donor): a deceased person from whom at least one organ has been recovered for the purpose of organ transplantation.

DBD donor: a deceased donor whose death has been determined by neurological criteria.

DCD donor: a deceased donor whose death has been determined by circulatory criteria.

Domino Transplant: a procedure in which an organ is removed from one transplant candidate and immediately transplanted into a second patient, with the first patient receiving a new organ from a deceased donor.

Transplants are counted as those performed only within the country. Counts for multiorgan or double organ transplants are counted as follows:

- One double kidney transplant is considered as one transplant.
- One heart-lung transplant is counted as one lung transplant and one heart transplant.
- One double lung transplant is considered as one transplant.
- One kidney-pancreas transplant is counted as one kidney transplant and one pancreas transplant.

Counts for the number of recipients transplanted: a recipient of more than one organ is counted as one recipient.
Specific indicators have been added to the questionnaire along the years, in order to provide further information about the donation and transplantation activities performed around the globe.

The data provided correspond to the period from January 1st to December 31st 2022. Only countries reporting data for 2022 have been included in this report.

Comparisons 2020 vs 2021 vs 2022 have been made with the most up to date data collected in the database (last accessed: October 2023).

To calculate rates per million population, the State of World Population reports, from the United Nations Population Fund (UNFPA), has been used as the source to estimate the population size. Figures for Human Development Index (HDI) are obtained from the United Nations Development Programme (UNDP), [Human Development Report 2021/2022](#).

Data were analysed using descriptive statistics. Statistical analysis was performed with SPSS software (version 25.0) and the Excel tool was used for the creation of bar charts.
Acronyms

- **DBD**: Actual donors after the neurologic determination of death
- **DCD**: Actual donors after the circulatory determination of death
- **DD**: Actual deceased organ donors
- **LD**: Living organ donors
- **GODT**: Global Observatory on Donation and Transplantation
- **KT**: Kidney transplants
- **LT**: Liver transplants

- **ONT**: Organización Nacional de Trasplantes, Spain
- **pmp**: per million population
- **Tx**: Transplants
- **WHO**: World Health Organization
- **HDI**: Human Development Index
DISCLAIMER

The data and information presented here are published in order to promote transparency in transplantation activities.

Whenever possible this information has been confirmed by official national sources. However, in some instances, there are still provisional estimates. It is therefore anticipated that some data presented may be modified without prior notice.

As the facts displayed here are not definitive, they cannot be reproduced or quoted unless shown with the appropriate warning and the date.

For any references to this report, the following should be quoted: Organ Donation and Transplantation Activities 2022 Report. Global Observatory on Donation and Transplantation (GODT).

For citations of the 2022 GODT data please quote the following: Those 2022 data are based on the Global Observatory on Donation and Transplantation (GODT) data, produced by the WHO-ONT collaboration.

For any references in Charts and bar chart, please quote: * Data of the WHO-ONT Global Observatory on Donation and Transplantation.
ACKNOWLEDGEMENTS

The GODT team is thankful to the identified focal points in Member States for their valuable participation in this international data sharing exercise, the Council of Europe for its support through the Newsletter Transplant, and the Spanish Government for its contribution to maintain the GODT.
